### **DETAILED ACTION**

This Office Action is in response to the amendment filed September 23, 2003 for the above identified patent application.

## **Drawings**

- The drawings are objected to because Figure 1 should include cutting plane lines 1. corresponding to the cross-sectional views of Figures 2 and 3, the rotation axis (16) in Figure 3 should be rotated by 90 degrees, the cross-sectional view of Figure 6 (filed Sept. 3, 2002) must include cross-hatching, the tooth flanks in Figure 6 are incorrectly labeled. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
- 2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "axis of rotation of said worm gear is skewed relative to an axis of rotation of said worm" (claim 10 and 44).

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112: Page 2

Application/Control Number: 09/728,244

Art Unit: 3682

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 4. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
  - -The limitation of claim 13 is unclear because it does not appear to further define the device recited in claim 1.

## Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1-3, 5, 8, 11-14, 17, 20, 21, 27, 28, 30-33, 35, 38, 40, 41, 45, and 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wildhaber (USP 2,935,887) in view of Rice et al. (USP 3,176,534).

Wildhaber discloses a worm gear drive having a worm formed with convexly shaped tooth flanks and a worm gear formed with concavely shaped tooth flanks.

Wildhaber does not disclose the worm and worm gear in double flank contact so that the gears mesh without backlash therebetween, however it was known to configure a worm gear set so as to be in double tooth flank contact. For example, the prior art to Rice et al. teaches a worm gear arrangement having a worm in double tooth flank contact with a worm gear. It would have been obvious to one of ordinary skill in the art

at the time the invention was made to modify the gear arrangement of Wildhaber such that the worm and worm gear are in double flank contact, as taught by Rice et al., motivation being to provide a gear train having no backlash.

## Allowable Subject Matter

7. Claims 6, 7, 9, 10, 15, 16, 18, 19, 22-25, 29, 36, 37, 39, 43, and 44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

8. Applicant's submission of an information disclosure statement under 37 CFR 1.97(c) with the fee set forth in 37 CFR 1.17(p) on August 21, 2003 prompted the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS**MADE FINAL. See MPEP § 609(B)(2)(i). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
